Educating Next Generation of Surgeon Performing Safe ERCP

ERCP is a surgical skill required by a surgeon in managing biliary stone disease. However, it can be daunting for junior surgeon to performed a skill that requires many years to cultivate it. This workshop is to educate next generational surgeons a safe approach of performing ERCP

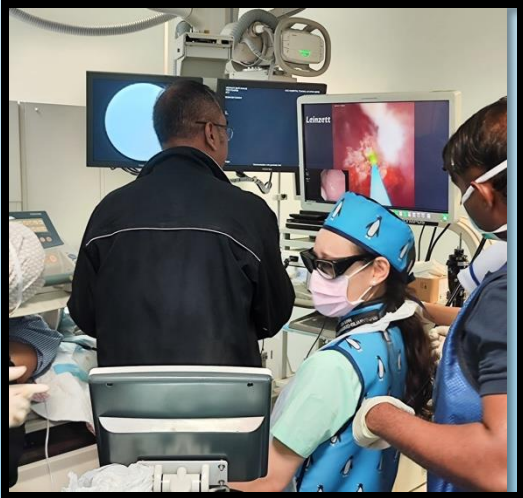

To Educate safe ERCP Technique

Surgical Department of Hospital Tuanku Ja'afar (HTJs) together with Hepatobiliary Unit of Hospital Tuanku Ja'afar.

Led by Ms Lim I Vern, Ms Nurzarina and Mr Chan organized a two-day ERCP workshop on the 11th and 12th September 2024 at HTJs

ABOUT THE WORKSHOP

Day 1 of the workshop was an introductory session on ERCP and demonstration of choledochoscopy and laser lithotripsy by the faculty, this was followed by lectures delivered by the experienced Hepatobiliary Surgeons, Anaesthesiologist and Radiologist on various topics of safe ERCP. This will lay a foundation of knowledge and leads participants in identifying improvement in ERCP techniques

Day 2 was practical and hands-on session lead and supervised by Hepatobiliary Surgeons, This practical session allowed participants to immediately apply and reinforced their knowledge , bridging theory and surgical technique
